iPOS.NET Wazirabad

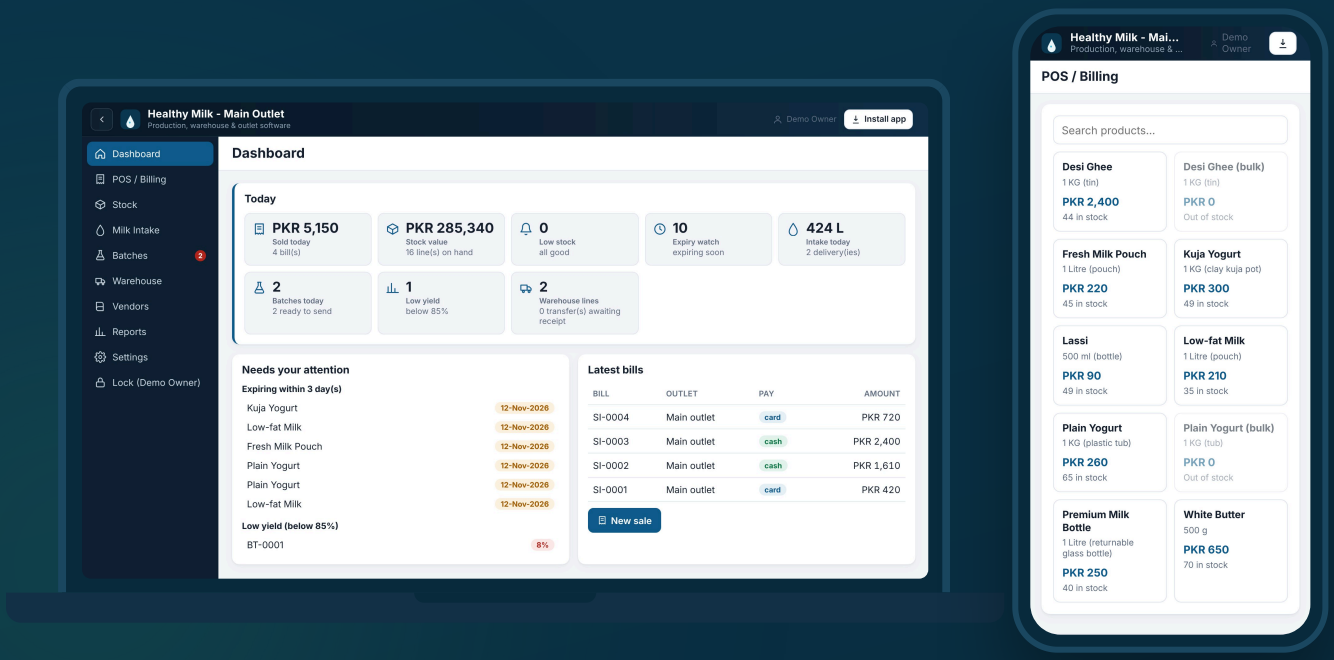

Dairy Business Management System

For **dairy manufacturers, warehouses & multi-branch outlets**

From milk intake to every outlet.

Production | **Warehouse** | **Outlet billing**

Dairy manufacturers | **Milk & yogurt shops** | **Multi-branch dairies** | **Staff PIN login**

Works **offline** on your shop PC, Android and iPhone — one outlet or ten.

0321-2121262 | www.iPOSWZD.com | Pak Pansar Store, Circular Road, Near Lahori Gate, Wazirabad

One system, from the milk tanker to the till.

Milk doesn't wait and neither should your business. The Dairy Business Management System runs production, warehouse stock and the outlet counter — and gives you one clear picture across all of it, even when the internet goes down.

At the counter

- Fast billing for **milk, yogurt, ghee, butter & lassi**
- Cash or card, totalled instantly
- Stock deducted the moment a sale is made
- Won't let staff sell more than what's on the shelf
- Staff PIN login — no shared passwords

In production & warehouse

- Record raw milk intake, batch it, track yield & expiry
- One central stock pool, fed by batches or manual receipts
- Dispatch stock to any outlet — received stock updates instantly
- Vendor ledger for packaging & supply payables
- Warehouse Manager, Production Staff and Owner roles

For the owner

- Today's sales, stock value & low-stock in one glance
- Batch yield and expiry watch across every outlet
- **Best sellers** and payment-method breakdown
- Export any report to CSV
- Licensed per outlet, simple activation codes

Who it's for

Dairy manufacturers · Milk & yogurt outlets · Multi-branch dairy sellers · Dairy distributors & warehouses

Offline-first on your PC, Android & iPhone — every module keeps working, synced automatically once online.

Everything a dairy outlet needs.

Built for how a dairy shop actually runs — fast counter sales, perishable stock, and more than one outlet to keep an eye on.

Counter & Billing

- One-tap billing for every **milk, yogurt & dairy** item
- Cash and card payment methods
- Live stock check — no overselling
- Instant totals, clean daily bill list

Stock & Batches

- Add stock manually by product, qty, batch # & expiry
- **Expiry watch** flags anything close to spoiling
- Low-stock warning at the level you set
- Add & edit products from the screen — no SQL needed

Multi-Outlet & Staff

- Run **one outlet or many** from the same app
- Staff PIN login — five built-in roles to choose from
- Hidden service account for support access
- Auto-lock after idle time, your choice of minutes

Reports & Insights

- Today / last 7 days / this month, or any date range
- **Best sellers** and sales by payment method
- Low-stock list at a glance
- One-click CSV export for every report

Works Anywhere

- **Fully offline** — sells through power or signal loss
- Installs as an app on PC, Android & iPhone (PWA)
- Mobile keyboard & touch friendly on every screen
- Backup & restore your outlet's data anytime

Licensing & Setup

- Free demo, no card or commitment needed
- Simple activation code per outlet
- Shop details, outlets & receipt footer — all editable
- Set up a working outlet in under a minute

From raw milk to the warehouse shelf.

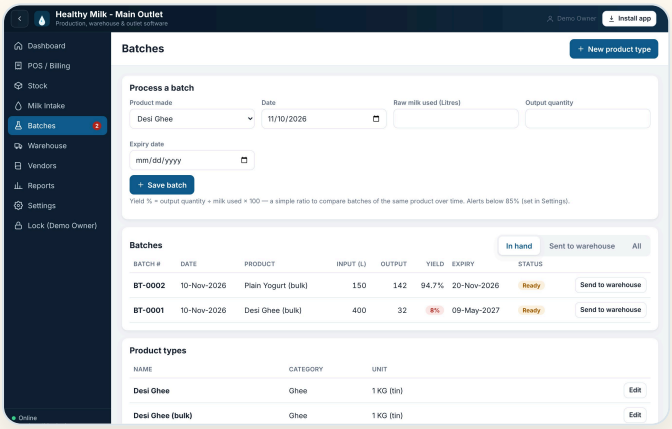

Already running the Outlet app? Production and Warehouse plug straight into it as add-on modules — same app, same login screen, no second system to learn.

Production

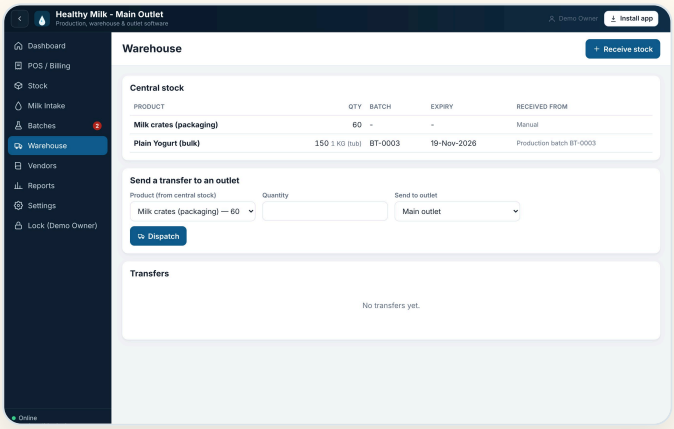

- Record raw **milk intake** per supplier, with fat % & SNF %
- Process a batch — input litres → output qty, **yield %** calculated for you
- Low-yield alert at the level you set
- Expiry date carried from the batch all the way to stock
- One tap **sends a finished batch to warehouse** — no re-typing

Warehouse

- One central stock pool — from production batches or manual receipts
- **Dispatch a transfer** to any outlet in a tap
- Outlet stock updates the moment a transfer is marked received
- Vendor ledger — purchases & payments, running balance per vendor
- Warehouse Manager role sees stock, transfers & payables only

Process a batch, yield calculated automatically

Central stock & one-tap transfers to any outlet

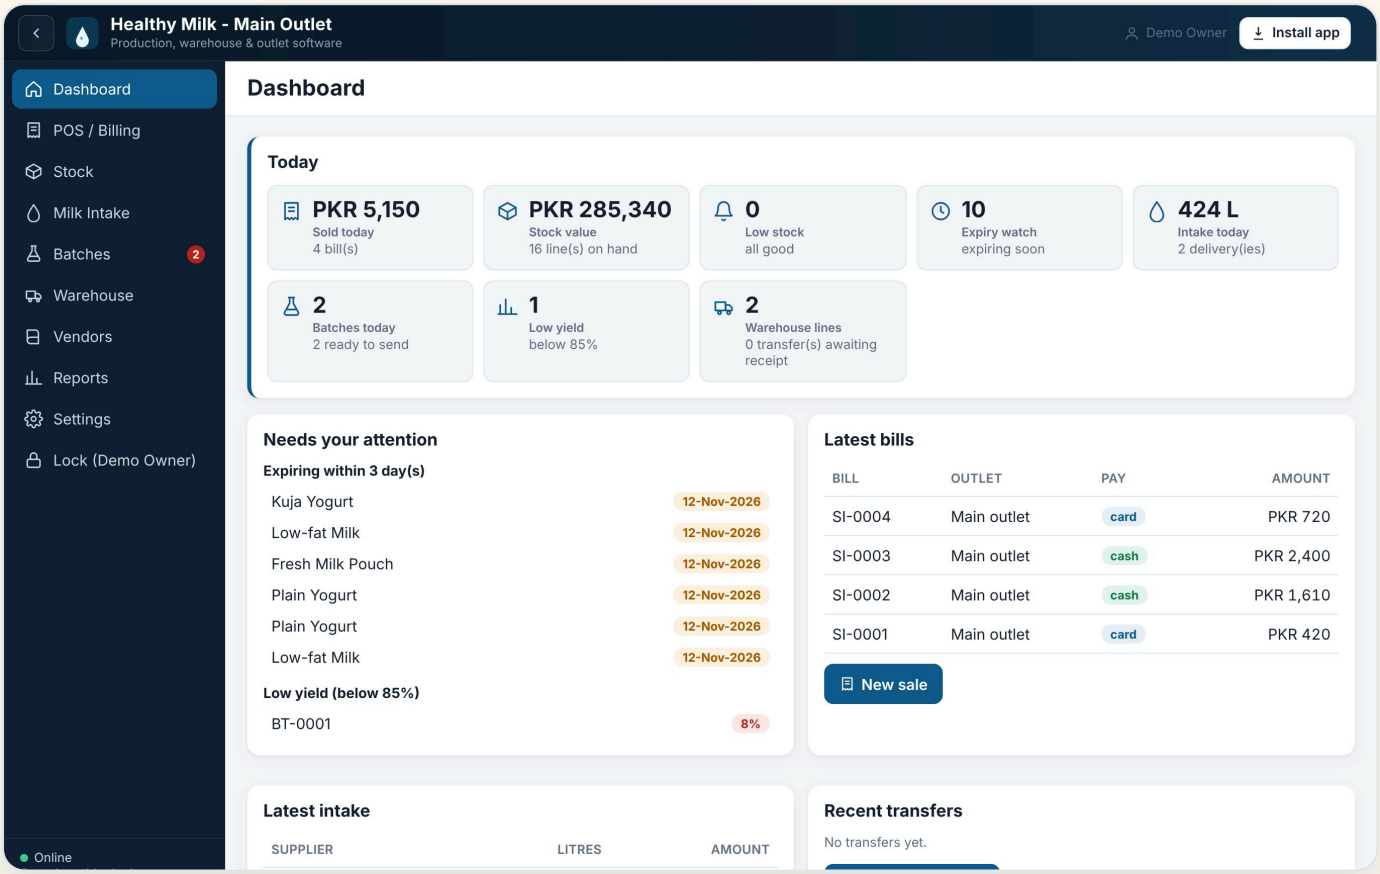

Add-on modules for your outlet

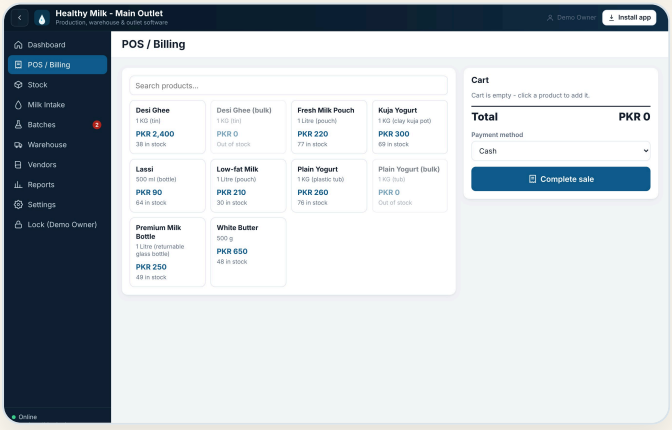

Works with your existing outlet app & staff logins. Price: call or WhatsApp for a quote.

Scan to try the full demo — production, warehouse & outlet together

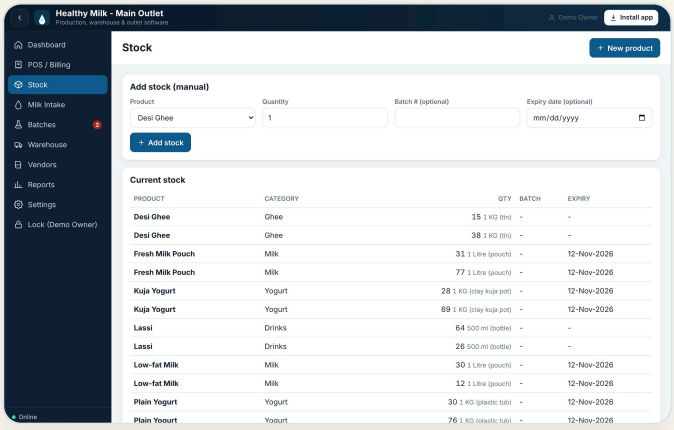

The whole business, at a glance.

Today's sales, stock value, intake, batches and warehouse transfers — before the morning tea is even finished.

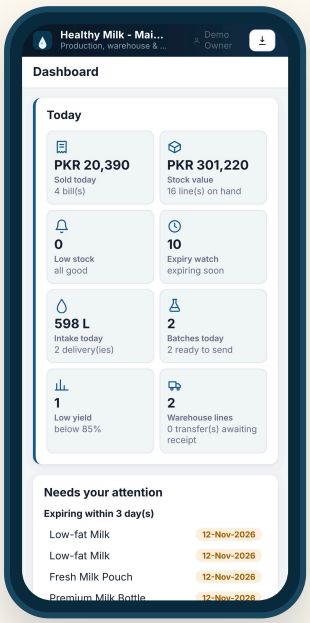

Fast POS — tap a product, bill is ready

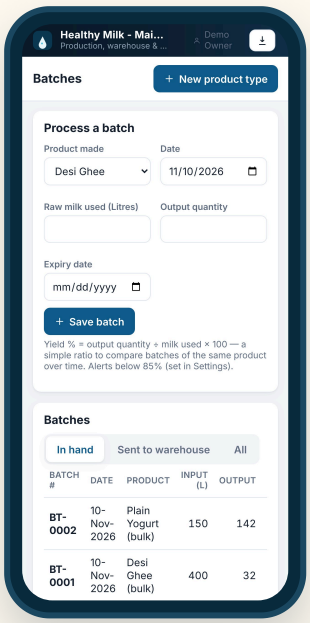

Stock with batch & expiry, product by product

Every module fits in a pocket.

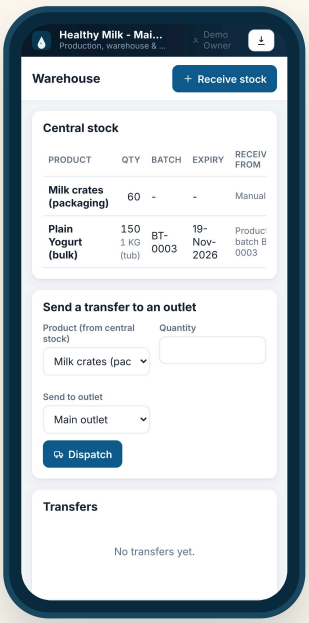

The same dashboard, intake form and warehouse screen, resized for a phone — install it like any app, no app store needed.

Dashboard on Android/iPhone

Batches & yield, on the move

Warehouse transfers from a phone

Receipts

Clean printed or shared receipts for every sale.

Reports

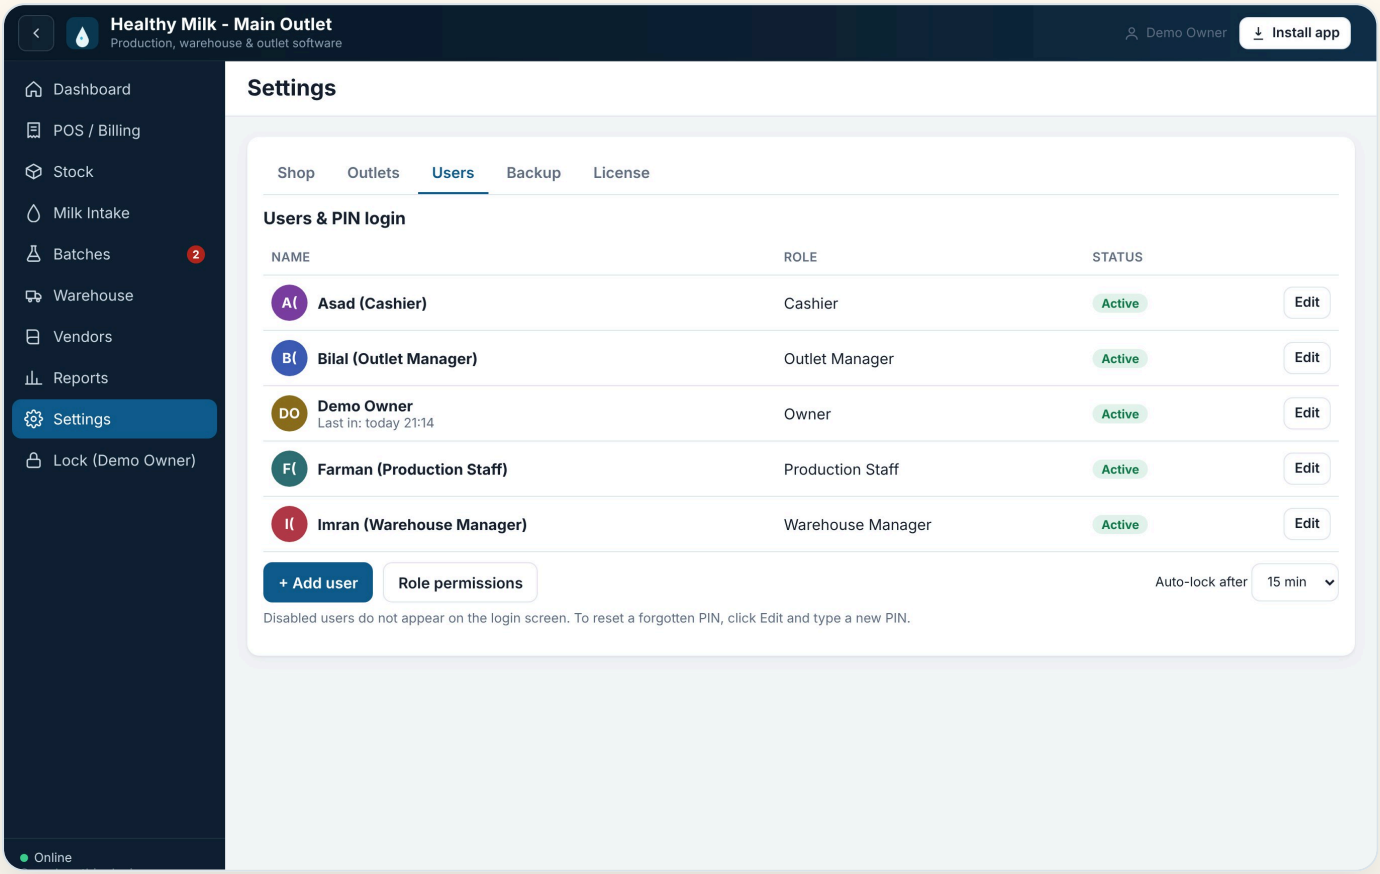

Every report exports straight to CSV.

Backup

Back up and restore your outlet's data in one tap.

Fast at the counter, locked for everyone else.

A busy counter can't wait for a password screen — and an owner shouldn't have to wonder who touched what, in production, warehouse or the till.

Staff login & PINs

- Every staff member gets their own **PIN**, not a shared login
- Five built-in roles: Owner, Outlet Manager, Cashier, Production Staff, Warehouse Manager
- Disabled staff drop off the login screen instantly
- Forgot a PIN? Reset it from Settings in seconds

Roles & auto-lock

- Each role sees only its own module — cashier never sees warehouse cost prices
- Auto-lock after idle time — your choice of minutes
- Hidden service account for remote support, never shown to staff
- Backup & restore protects your data if a device is lost

Up and running in a minute.

Try it free with sample data today, go live with your own outlet whenever you're ready — add Production and Warehouse whenever you expand.

1. **Free demo**
   Open the app and try it instantly with sample intake, batches, warehouse stock and sales — no sign-up, no card.

2. **Setup**
   Add your shop details, outlets and staff PINs. Takes a minute, works the same on PC or phone.

3. **Training**
   A short walkthrough with your team — billing, stock, and production/warehouse if you've added them.

4. **Support**
   Ongoing WhatsApp & phone support from iPOS.NET Wazirabad.

What you get

- ✓ Full offline-first Dairy Business Management System, PC + Android + iPhone
- ✓ Staff PIN login with five roles, multi-outlet ready
- ✓ Batch/expiry stock, reports & CSV export
- ✓ Production & Warehouse modules available as add-ons when you're ready
- ✓ Setup, training & ongoing support from iPOS.NET Wazirabad

Ready to see it on your own stock?
