**MADE FOR SIZE & COLOUR STOCK**

Every size, every colour, **counted**

A normal POS sees one item. A garments shop has the same article in six sizes and four colours, and loses sales when the popular sizes finish unnoticed. Garments POS keeps stock, price and barcode for each size and colour, and tells you what to reorder.

AT THE COUNTER**Sell**

Scan a label and the exact size is on the bill.

- Desktop billing or touch screen
- Tap the article, tap the size
- Cash, card, JazzCash, Easypaisa, Raast, split
- Size exchange, credit notes, hold bills
- Receipt and WhatsApp thank-you

IN THE STOCK ROOM**Stock**

A grid of colours × sizes for every article.

- Purchase entry by size grid
- Barcode labels for every piece
- Stock audit by scanning
- Reorder list by size
- Branch transfers and godown

FOR THE OWNER**Control**

Know what sells and what sits.

- Dashboard with sizes finished
- Profit by article and brand
- Dead stock and season close-out
- Salesmen, targets and salary sheet
- Activity log of every change
